Response to Amendment

1. Applicant's amendment filed 01/13/2006 has been entered and carefully considered.

Claims 1-6 and 8-24 have been cancelled.

Reasons for Allowance

2. Claim 7 is allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Please see the previous office action and applicant's argument filed on 09/28/2005 and 01/13/2006.

Regarding claim 7, none of the prior art of record teaches or suggests the combination of a method of predicting future values of a target metric associated with a task executed on a computer system, comprising the steps: transforming said measurement into a value for a predictor source metric; and using the value for the predictor source metric to obtain a predicted future value for said target metric; wherein the using step includes the step of providing a set of possible future values; and wherein the step of providing a set of possible future values includes the steps of: identifying values that the target metric had at different times; for each of said identified values of the target metric, determining the value that the source metric had before the time at which the target metric had the identified value; and using said identified values of the target metric as the possible future values. It is these limitations as they are claimed in

Art Unit: 2863

the combination with other limitations of claim, which have not been found, taught or suggested in the prior art of record, that make these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
